UNPACKING THE SYSTEM

1

Carefully unbox your SuperPonics® system. Remove all contents from inside the Reservoir as well.

2

Prior to setup, make sure you have all of the necessary components by cross referencing with the QAC (Quality Assurance Checklist). Take this time to familiarize yourself with each of the components.

SET UP

1

Remove the lid from the SuperCloner 50 system and set it aside for now. Notice the channels located on the rim of the Reservoir. These channels will be for the placement of your Air Pump Tubing.

2

Locate the two blue Air Stones included in your shipment. Place the Air Stones at the bottom of the SuperPonics® Reservoir.

NOTE:

The Air Stones have a male end that will fit in the black Air Pump Tubing.

3

Connect the Air Pump Tubing to the end of the Air Stones. Arrange the tubing into the channels located on rim of the Reservoir.

SET UP

4

Locate the Eco2 Air Pump included in your shipment. Connect the open end of the black tubing from the Air Stones to the metallic outputs located on the Air Pump.

NOTE:
THIS PUMP SHOULD
NEVER BE PLACED IN
WATER

SUPER GROW TIP

Your plant roots need and love oxygen! It is extremely important to the health of the plants that you keep your Air Pump and Air Stones running at all times when the system is in use.

SET UP

5

Place the lid on your SuperCloner 50 and insert the Net Cups. See the below graphic for tips on growing medium and water levels.
